Acoustics

Conference on the Physics of the Condensed State P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168

Multiple Acceleration of Particles in a Potential Electric Field by Means of Charge Exchange (T). G. N. Vyalov and M. M. Fiks — 525

Application of Physical Methods to Other Sciences

X-ray Structure Analysis of Globular Proteins (E). B. K. Vaĭnshtein — 251

Research in the Field of Gamma-resonance (Mossbauer) Spectroscopy (E). V. I. Gol'danskiĭ — 461

Astrophysics (see also: Cosmology; Physics of the Planetary System and of Interplanetary Space; Neutrino, X-ray, and Gamma Astronomy; Cosmic Gas- and Electrodynamics)

Magnetic Fields of the Sun and Stars (E). A. B. Severnyĭ — 1

Interplanetary Flickering of Radio Sources and its Use in Astrophysics (E). N. A. Lotova and V. M. Finkel'berg — 180

Origin of Cosmic Rays (T). V. L. Ginzburg and S. I. Syrovat-skiĭ — 223

Dynamics of the Solar Atmosphere. S. B. Pikel'ner — 236

Statistical Acceleration of Particles in a Turbulent Plasma (T/E). V. N. Tsytovich — 370

Powerful X-ray Emission of Radio Galaxies. V. L. Ginzburg — 543

The "Hot" Model of the Universe (T). Ya. B. Zel'dovich — 602

The Eleven Year Cycle of Solar Activity (E). M. N. Gnevyshev — 752

Atom (see also Atomic and Molecular Beams; Ionization)

Plasma Oscillations of the Electron Shell of the Atom (T/E). D. A. Kirzhnits and Yu. E. Lozovik — 340

Third All-union Conference on Physics of Electronic and Atomic Collisions. G. F. Drukarev and L. A. Sena — 631

The Effect of Collisions on the Doppler Broadening of Spectral Lines. S. G. Rautian and I. I. Sobel'man — 701

Atomic Nucleus
Research in the Field of Gamma-resonance (Mossbauer) Spectroscopy (E). V. I. Gol'danskiĭ — 461
Nuclei with Excess Neutrons (T). N. A. Vlasov — 624
Biophysics
X-ray Structure Analysis of Globular Proteins (E). B. K. Vaĭnshtein — 251
Birefringence - see Optical Anisotropy and Polarization of Light
Classical Electrodynamics
Diffraction Radiation (T). B. M. Bolotovskiĭ and G. V. Voskrsenskiĭ — 73
A Natural System of Units in Classical Electrodynamics and Electronics (T). S. P. Kapitza — 184
Statistical Acceleration of Particles in a Turbulent Plasma (T/E). V. N. Tsytovich — 370
Cosmic Gas- and Electrodynamics (see also Physics of the Planetary Space and Interplanetary Space)
Dynamics of the Solar Atmosphere S. B. Pikel'ner — 236
Cosmic Rays
Origin of Cosmic Rays (T). V. L. Ginzburg and S. I. Syrovat-skiĭ — 223
Statistical Acceleration of Particles in a Turbulent Plasma (T/E). V. N. Tsytovich — 370
Cosmology
The "Hot" Model of the Universe (T). Ya. B. Zel'dovich — 602
Crystal Optics (see also Nonlinear optics; Optic Anisotropy and Polarization of Light)
Electro-optical Effects in Crystals (E). I. S. Zheludev — 97
Sixth All-Union Symposium on Semiconductor Theory A. G. Aronov and V. S. Oskot-skiĭ — 153
Conference on the Physics of the Condensed State P. A. Bezuglyĭ, V. V. Ermenko, L. S. Kukushkin, I. O. Kulik, V. G. Mazheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
Modern Trends in the Spectroscopy of Raman Scattering of Light (E). V. A. Zubov, M. M. Sushchinskiĭ, and I. K. Shuvalov — 346
All-union Seminar on Excitons in Crystals. E. F. Sheka — 453
Crystalline State of Matter
Some Relationships Governing the P-T Phase Diagrams and Polymorphic Transformations of Elements Under High Pressures (E). V. V. Evdokimova — 54
Sixth All-Union Symposium on Semiconductor Theory. A. G. Aronov and V. S. Oskot-skiĭ — 153
All-Union Seminar on Excitons in Crystals. E. F. Sheka — 453
Twelfth All-Union Conference on Low-temperature Physics. M. I. Kaganov, B. I. Kochilaev, and V. G. Peschanskiĭ — 627
Dielectrics
Electro-optical Effects in Crystals (E). I. S. Zheludev — 97
Diffusion
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. I. Peresada, V. G. Peschanskiĭ, and L. A. Shishkin — 168
Electron Theory of Metals
Electromagnetic Waves in Metals in a Magnetic Field (T). É. A. Kaner and V. G. Skobov — 480
Electronics
A Natural System of Units in Classical Electrodynamics and Electronics (T). S. P. Kapitza — 184
Elementary Particles (see also Quantum Field Theory; Cosmic Rays; Resonance States of Elementary Particles)

The Violation of CP Invariance. L. B. Okun' — 574
Double Beta Decay and the Properties of the Neutrino (E). V. R. Lazarenko — 860
Sixth All-union Conference on the Theory of Elementary Particles. Yu. M. Lomsadze — 918
Elements and Periodic System
Some Relationships Governing the P-T Phase Diagrams and Polymorphic Transformations of Elements Under High Pressures (E). V. V. Evdokimova — 54
Excitons - see Crystalline State of Matter; Crystal Optics
Ferroelectricity
Electro-optical Effects in Crystals (E). I. S. Zheludev — 97
Ferromagnetism - see Magnetic Properties of Matter
Gas Discharge (see also Ionization)
Third All-union Conference on Physics of Electronic and Atomic Collisions. F. G. Drukarev and L. A. Sena — 631
High Energies - see Elementary particles; Resonance States of Elementary Particles; Cosmic Rays
High Molecular Compounds - see Polymers
High Pressures
Some Relationships Governing the P-T Phase Diagrams and Polymorphic Transformations of Elements Under High Pressures (E). V. V. Evdokima — 54
History of Physics
Three Letters of Russian Physicists to W. K. Roentgen. V. K. Tomas — 913
Instruments and Methods of Physical Measurements (see also Methods of Particle Registration; Radiation Detectors)
Portable Radiation Source for X-ray Investigations (E). V. U. — 183
Nuclear Radiation Detectors Based on Image Intensifiers (E). M. N. Medvedev — 767
The Avalanche-transit Diode and Its Use in Microwaves (E). A. S. Tager — 892
Ion Beams
Multiple Acceleration of Particles in a Potential Electric Field by Means of Charge Exchange. G. N. Vyalov and M. M. Fiks — 525
Ionization (see also Gas Discharge)
Third All-union Conference on Physics of Electronic and Atomic Collisions. G. F. Drukarev and L. A. Sena — 631
Liquid Helium
Charge Transport Mechanism in Liquid Helium (T). R. G. Arkhipov — 174
New Research on the Properties of Liquid Helium. L. P. Pitaevskii — 191

Liquid State
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
Liquid Crystals (E). I. G. Chistyakov — 551
Low Temperatures
The Pomeranchuk Effect and Infralow Temperatures (T/E). V. K. Ignatovich — 177
Twelfth All-union Conference on Low-temperature Physics. M. I. Kaganov, B. I. Kochilaev, and V. G. Peschanskiĭ — 627
Macroscopic Quantum Phenomena (E). L. P. Pitaevskiĭ — 888
Luminescence
Sixth All-union Symposium on Semiconductor Theory. A. G. Aronov and V. S. Oskot-skiĭ — 153
All-union Seminar on Excitons in Crystals. E. F. Sheka — 453
Chemiluminescence in Solutions (E). R. F. Vasil'ev — 504
Magnetic Properties of Matter (see also Neutron Diffraction)
Sixth All-Union Symposium on Semiconductor Theory. A. G. Aronov and V. S. Oskot-skiĭ — 153
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Ermenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
Concerning a Sensational Effect (Letter to the Editor) (T). V. G. Levich — 316
The Physics of Magnetic Materials. S. V. Vonsovskiĭ — 874
Magnetic Resonance
Sixth All-Union Symposium on Semiconductor Theory. A. G. Aronov and V. S. Oskot-skiĭ — 153
Relaxation Phenomena in Solids (Conference). R. I. Garber — 300
Twelfth All-union Conference on Low-temperature Physics. M. I. Kaganov, B. I. Kochilaev, and V. G. Peschanskiĭ — 627
Magnetohydrodynamics
Magnetohydrodynamic Waves (T). R. V. Polovin and K. P. Cherkasova — 278
Magnetooptic Phenomena
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
Magnetosphere
Statistical Acceleration of Particles in a Turbulent Plasma (T/E). V. N. Tsytovich — 370
Very-low-frequency Radio Emission of the Upper Atmosphere and its Relationship with other Geophysical Phenomena (E). B. N. Gershman and V. Yu. Trakhtengerts — 414
Metal Physics (see also Electron Theory of Metals)
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Ermenko, L. S. Kukushkin, I. O. Kulik, V. G. Mazheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
Relaxation Phenomena in Solids (Conference). R. I. Garber — 300

Quantum Electronics (see also Quantum Radiation Generators)
Electro-optical Effects in Crystals (E). I. S. Zheludev — 97
Conference on the Physics of the Condensed State, P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. A. Popov, and L. A. Shishkin — 168
Gas Laser in a Magnetic Field (T/E). M. I. D'yakonov and S. A. Fridrikhov — 837
Quantum Field Theory (see also Quantum Electrodynamics)
Asymptotic Relations Between Scattering Amplitudes in Local Field Theory (T). A. A. Logunov, Nguyen Van Hieu, and I. T. Todorov — 31
Theory of Reactions with Production of Three Particles Near Threshold (T). V. V. Anisovich and A. A. Ansel'm — 117
Basis for Special Relativity Theory Provided by Experiments in High Energy Physics (T). D. I. Blokhintsev — 405
Nonlocal Quantum Field Theory (T). D. A. Kirzhnits — 692
Quantum Radiation Generators
Parametric Amplifiers and Generators of Light (E/T). S. A. Akhmanov and R. V. Khokhlov — 210
Radiation Detectors
Nuclear Radiation Detectors Based on Image Intensifiers (E). M. N. Medvedev — 767
Radioastronomy
Interplanetary Flickering of Radio Sources and Its Use in Astrophysics (E). N. A. Lotova and V. M. Finkel'berg — 180
Results of Radio Observations of Mercury, Venus, and Mars (E). A. D. Kuz'min — 759
Raman Scattering of Light
Modern Trends in the Spectroscopy of Raman Scattering of Light (E). V. A. Zubqv, M. M. Sushchinskiĭ, and I. K. Shuvalov — 346
Relativity Theory
The General Theory of Relativity (T). A. Trautman — 319
Basis for Special Relativity Theory Provided by Experiments in High Energy Physics (T). D. I. Blokhintsev — 405
Resonance States of Elementary Particles
Theory of Reactions with Production of Three Particles Near Threshold (T). V. V. Anisovich and A. A. Ansel'm — 117
Scattering of Light (see also Raman Scattering)
Semiconductors
Sixth All-Union Symposium on Semiconductor Theory. A. G. Aronov and V. S. Oskot-skiĭ — 153
The Kapitza-Dirac Effect. V. S. Letokhov — 178
Electronic Processes at the Surface of a Semiconductor During Chemisorption (T/E). F. F. Vol'kenshteĭn — 743
Solutions
Chemiluminescence in Solutions (E). R. F. Vasil'ev — 504
Solid State (see also Metal Physics; Crystalline State of Matter; Semiconductors; Electron Theory of Metals)
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Manzheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishin — 168
Relaxation Phenomena in Solids (Conference). R. I. Garber — 300
Research in the Field of Gamma-resonance (Mossbauer) Spectroscopy (E). V. I. Gol'danskiĭ — 461
Sound - see Acoustics
Spectroscopy
Modern Trends in the Spectroscopy of Raman Scattering of Light (E). V. A. Zubov, M. M. Suhchinskiĭ and I. K. Shuvalov — 346
The Effect of Collisions on the Doppler Broadening of Spectral Lines. S. G. Rautian and I. I. Sobel'man — 701
Probability of Electron-vibrational Transitions in Diatomic Molecules (T). F. S. Ortenberg and E. T. Antropov — 717
Statistical Physics - see Thermodynamics
Strong Magnetic Fields
Magnetoimplosive Generators (E). A. D. Sakharov — 294
Superconductivity
The Electron Mechanism of Superconductivity (T). B. T. Geĭlikman — 142
Conference on the Physics of the Condensed State. P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Mazheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
The Josephson Tunneling Effect in Superconductors (T/E). G. F. Zharkov — 198
Superfluidity - see Liquid Helium
Surface Phenomena
Electronic Processes at the Surface of a Semiconductor During Chemisorption (T/E). F. F. Vol'kenshteĭn — 743

Teaching of Physics
Doppler Effect in the Case of a Moving Image (Methodological Note) (E). P. Paradoksov — 276
Gas Laser—Lecture Demonstrations of its Operation and its Use in Physics Teaching Laboratories (Methodological Note) (E). T. S. Velichkina, O. A. Shustin, and I. A. Yakovlev — 301
Effect of the Joint Motion of a Sound Source and Receiver on the Phase Difference Between their Oscillations (E). K. N. Baranskiĭ and L. V. Zubareva — 448
Two Lecture Demonstrations. V. A. Zore and A. Ya. Yashkin — 448
Birefringence of Microwaves. B. Sh. Perkal'skis and V. L. Larin — 449
Demonstration of Deionization of a Mercury Plasma (E). F. Kh. Baĭbulatov — 451
How Quantum Mechanics Helps Us Understand Classical Mechanics. P. Paradoksov — 618
New Experiments on the Combining of Mechanical Vibrations and on Mechanical Resonance. Ya. E. Amstislavskiĭ and A. S. Mamakov — 621
Demonstration of the Coherent Properties of a Gas Laser. N. I. Kaliteevskiĭ — 781
The New Physics Demonstrations. A. N. Kozlova and Yu. A. Khvorov — 916
Thermodynamics
Conference on the Physics of the Condensed State, P. A. Bezuglyĭ, V. V. Eremenko, L. S. Kukushkin, I. O. Kulik, V. G. Mazheliĭ, V. I. Peresada, V. G. Peschanskiĭ, V. A. Popov, and L. A. Shishkin — 168
Upper Atmosphere
Very-low-frequency Radio Emission of the Upper Atmosphere and its Relationship with other Geophysical Phenomena (E). B. N. Gershman and V. Yu. Trakhtengerts — 414
The Outer Ionosphere and Its Transition to the Interplanetary Medium (E). Ya. L. Al'pert — 787
X-ray Analysis
Portable Radiation Source for X-ray Investigations (E). U. V. — 183
X-ray Structure Analysis of Globular Proteins (E). B. K. Vaĭnshtein — 251
Accelerators and Storage Rings
Accelerators with Colliding Particle Beams (E). G. I. Budker — 534
